**Sarthak Malik
(CP)**

Sarthak Malik, a six-year-old boy from Jolkul village in Hooghly district, was born under challenging circumstances—his mother faced severe health issues during pregnancy, and at birth, Sarthak did not cry and required ICU care for fever. When he was 10 months old, GBCD had identified through a health worker of Jolkul health Centre. First of all we visited his home for a basic survey to collect the family background of child. After identification we informed our working areas and counsel the parents then we have enrolled his name in early intervention programme and home based support. When we first saw him he had no neck control, was unable to swallow food, stiffness in joints and muscles and he had no ADL activities. He used to babbling for communication.

Through regular therapy, parent training, and community awareness efforts, he has shown significant improvement—now able to stand and walk with support, eats dry foods through his own hand and now he is able to speak single words like “Maa”, “Baba”, “Mama” etc. Now he reads in class 1 in Jolkul primary school and recognises various vegetables and fruits. The family as well as child’s acceptance has increased in community and relatives.

His family, once isolated and uncertain, is now hopeful and envisions a future where Sarthak pursues higher education and lives independently.

July - September'25: Fourth Coming Events

1. *Childhood Disability screening camp at sub health centers.*
2. *ICDS & Health workers training*
3. *Deaf Week Celebration*
