Blood Donating by Deaf Adults (Girl)

**KisanjitBaul
das**

KrishanjitBauldas, a 5-year-old boy with Multiple Disability. He lives with his parents and grandmother in small village of Dwarbashini, located in Pandua block of Hooghly district. His father MithunBauldasis a daily wage earner and mother KarabiBauldas is a house wife.

GBCD had identified him in 2023 when he was 3 years 8 months through a neighbor. When he was identified he had epilepsy. He was unable to walk and perform any Activities of daily living (ADL). He could not recognize anything. He exhibited hyperactivity, did not stay in one place and moved around by crawling. He had no eye contact, no social interaction, poor concentration level. He did not speak and only responded by crying.

After identification initial counseling and guidance to his parents and GBCD had enrolled him in early intervention programme. After few days we had started regular home based support. To ensure holistic development our CBRWs taught him to perform ADL activities properly, Matching (Objects, Colors, and Words), Social Norms, provide various exercises to develop concentration level, writing his name & address etc. In addition to home based support GBCD has also provided medicinal support, physiotherapy support along with this GBCD had conducted psychological assessment (IQ Test) by our Psychologist. His parents was also aware and regular attend Short stay Camps, parents meeting and training on regular basis. We have also organized awareness programme at his community and ICDS to sensitize ICDS workers his disability. GBCD has facilitated the linkage with Govt. facilities like MANABIK pension, UDID card etc.

After rehabilitation his epilepsy was controlled and developed confidence regarding ADL activities, now he can walk without support, eating independently. Now he attends ICDS centre regularly. His behavioral issues has changed and developed social norms in him. His hyper active behavior has reduced and able to sit at one place more than 20 minutes. He has overcome his speech difficulties as well and is able to say one or two words such as “maa, baba, didi”. His family desire that he will speak sentence clearly and he will efficient for his ADL activities in future.
